(project under construction)

<https://github.com/SchroederSimon/toDo>

-Using news api (simple): **HTML, CSS, TS, Bootstrap**.

<https://github.com/SchroederSimon/prueba-api-noticias>

Education

-**Argentina Programa 1 & 2.** (gov course)

Finished.

-**Industrial design** (2014-*): FADU UNL, advanced student.

Unconcluded.

-**Start as self taught in October 2021**

On going.

About Me

Hi, I'm currently studying to be a self-taught **front-end** developer and trying to get **my first job**. I've done Argentina programa 2 (gov course) but felt really lonely in the process, so I learned how to **manage my time and resources** to learn by myself. In this way, I believe **it reflects my personality**. I was in front of a challenge and **did everything to do my best to achieve the challenge**. I had to overcome frustration, use a lot of google, read a lot of documentation, and stay long nights at the pc. The course is planned to teach how to be a full stack web developer, but I just prefer front-end because I have a good background in design and i liked most. But i'm obviously opened to new things. **Besides that course, I continue to study on my own.**

I see myself as a **self-motivated person** who is **committed** to delivering **quality results**, and I'm excited to bring my **enthusiasm and skills** to a dynamic **team environment**.
