Hard skills

- HTML.
- CSS.
- Typescript.
- JavaScript.
- Angular.
- Firebase.
- GIT.
- English: B1.
- MySQL.

Soft skills

- Creativity.
- Multitasking.
- Frustration tolerance.
- Empathy.
- Prone to seek different solutions to a problem.

Projects

-Personal portfolio, connected with database (CRUD): **HTML, CSS, Typescript, Firebase** (authentication, database, deploy), framework: **Angular**.

-Most hard project so far. Made for "Argentina programa stage 2" (gov course).

<https://github.com/SchroederSimon/ArgentinaPrograma>

<https://argentinaprograma-3231d.web.app/#/portfolio>

-Auth api (with JWT): **JS**.

https://github.com/SchroederSimon/Api_Mongo_Practica

-Using news api (simple): **HTML, CSS, TS, JS**.

<https://github.com/SchroederSimon/prueba-api-noticias>

-Movies website: **HTML, CSS**.

<https://schroedersimon.github.io/WebPelículas/>

-Login redesign Banco Entre Ríos: **HTML, CSS**.

<https://schroedersimon.github.io/LoginPractica/>

Education

-Argentina Programa 1 & 2.
Finished.

-Industrial design (2014-*): FADU UNL, advanced student.
Unconcluded.

About Me

Hi, I'm currently studying to be a self-taught front-end developer and trying to get my first job. I've done Argentina programa 2 but felt lonely in the process, so I learned how to manage my time and resources to learn by myself. In that way I think the project reflects my personality. I was in front of a challenge and did everything to do my best. I had to overcome frustration, use a lot of google and stay long nights at the pc. The course is planned to teach how to be a full stack web developer, but I just prefer front-end because I have a good background in design.
